

TEST SUMMARY REPORT

Nutrivision

Abstract

This document presents the final results of manual testing performed on the NutriVision web application. It summarizes the overall testing activities, including test execution statistics, defect summary, regression testing results, and the final assessment of the application's quality. The report confirms that all planned test cases were executed, reported defects were verified after fixes, and the application met the defined functional requirements for release.

TEST SUMMARY REPORT

Project Information

Project Name

NutriVision – Smart Food Recognition & Nutrition Analyzer

Testing Type

Manual Functional Testing

Tester

Alishba Rashid

Testing Duration

30 June 2026 – 2 July 2026

Environment

Google Chrome (Latest)

Windows 11

Scope

Testing covered:

- Landing Page
- Authentication
- Dashboard
- AI Food Analyzer
- Analysis Results
- Manual Food Search
- History
- Profile
- Settings
- Responsive Design

Test Execution Summary

Metric	Count
Test Scenarios	43
Test Cases	62
Executed	62
Passed	62
Failed	0
Blocked	0
Pass Percentage	100%

Bug Summary

Severity	Count
Critical	1
High	3
Medium	1
Low	0
Total Bugs	5

Defect Status

Status	Count
Closed	5

Regression Testing

Regression testing was performed after defect fixes.

All previously reported defects were successfully verified and no new issues were introduced.

Conclusion

Manual testing of NutriVision was successfully completed.

All planned test cases were executed.

All reported defects were fixed and verified through regression testing.

The application meets the defined functional requirements and is considered stable for release.
